

MUSIC CAREER SIMULATOR

Development Roadmap · April – June 2025
First Prototype Target: 20th June 2025

7 PHASES	~70 DAYS	4 DAYS IN ALREADY	∞ AMBITION
-------------	-------------	----------------------	---------------

TIMELINE

APR 21	MAY 1	MAY 10	MAY 20	MAY 30	JUN 10	JUN 20
--------	-------	--------	--------	--------	--------	--------

DEVELOPMENT PHASES

01	Stability & Foundation → Wrap up all money, popularity, and fatigue bugs and edge cases → Add and integrate the Happiness Meter → Fine-tune fatigue recovery, job cost cases, and pay penalty logic → Ensure all existing modules (jobs, management, streams) are stable
02	Live Concert, Interview & Reputation → Design and build the Live Concert module — venue tiers, ticket revenue, fatigue cost → Build the Interview module — question sets, response styles (humble / arrogant / controversial) → Introduce the Reputation system — distinct from popularity, industry-facing → Integrate reputation with interview outcomes, management reactions, and stream credibility
03	Artist Ecosystem — Architecture → Define the artist ecosystem structure — other artists, labels, collaborators, rivals → Build relationship graphs: who knows you, who respects you, who dislikes you → Lay groundwork for artist-to-artist interactions → Design data models that will support collabs, dissers, and co-signs

04

Artist Ecosystem — Integration

- Complete a fully functioning artist ecosystem
- Integrate ecosystem with popularity, reputation, and happiness meters
- Artist reactions to your releases, lives, and interviews
- Fans begin forming opinions about you relative to other artists

05

Creative Module — Controversy & Culture

- Controversy and scandal system — triggers, fallout, recovery arcs
- Diss tracks — write, release, escalation logic
- Artists talking about you — shoutouts, subtweets, features, beefs
- Complete the full creative interaction loop between artists

06

Industry & Media Layer

- Award shows — nominations, wins, snubs, acceptance speech tone matters
- Billboard charts — chart positions driven by streams, popularity, and timing
- Music videos — production cost, visual quality, view counts, virality
- Comment sections — dynamic, memory-aware, reacts to your trajectory
- Twitter / social media — trending moments, clout cycles, cancel risk

07

First Prototype — Polish & Integration

- Full end-to-end playthrough testing across all modules
- Balance pass on all meters — fatigue, happiness, reputation, popularity
- Fix integration gaps between newly added and existing systems
- First prototype ready: a complete, playable Music Career Simulator

■ ONGOING THROUGHOUT ALL PHASES

- Streaming process improvements — audio and video quality, buffering, live viewer experience
- Song creation and album creation — expanded options, management, and metadata
- Memory system for live viewers, commenters, and reviewers — they remember you
- Module integration — every new system connects to every existing one, no isolated features
